A Better Way Towards Justice

How Frizhub collaborated with Bramerz and developed a platform to outreach 300 probono cases?

VAKEEL ONLINE

About Vakeel Online

A COMBINATION OF MARKETPLACE AND SOCIAL MEDIA PLATFORM FOR LAWYERS AND PEOPLE OF PAKISTAN.

The pilot was a mega-hit. Vakeel Online managed to gain massive traction through a social media group. The group was bombarded with legal questions, queries, and rights. After getting huge traction from 30,000 people including lawyers, legal experts, social workers, and the general public, Vakeel online decided to take the next step.

The new platform is aiming to devote itself to helping the destitute that cannot afford justice and seeking legal aid. The marketplace helps anyone with a legal query while allowing the client to hire a lawyer too.

Frizhub worked as Justice Project Pakistan's engineering partner and helped them build a modern-day platform where lawyers can advance the conventional modes of client building. Solely motivated by a venue with a vision of access to justice by providing an open legal marketplace for everyone.

A Hope to Preserve "Justice for All"

Justice Project Pakistan reached us with the ideation of "justice for all".
The main purpose is to advance the conventional modes of client building and access to justice by providing an open Legal Market place for everyone.

In the continuous cycles of research and brainstorming sessions with Justice Project Pakistan, we highlighted and categorized that our main challenges were:

Problem

an accused person who is less fortunate to fight his case because of his financial circumstances.

Affect and Impacts

Smoothen the process of choosing a lawyer by eliminating the traditional bottlenecks faced by accused parties.
Automating the manual proceedings of gathering documents, evidence, ready-to-go petitions, and other info.

- people seeking free pre-legal advice and legal practitioners that are willing to offer it.
- allowing lawyers to freely accept a case of an accused person who cannot afford financially to fight for it.

Solution

An automated system that will allow people seeking free pre-legal advice and legal practitioners that are willing to offer it.

FRiZHUB

300+

Number of Cases

The system registered 300+ probono cases since the day it was launched.

FRiZHUB

Tech Stack Implementation

FRIZHUB WORKED WITH "JUSTICE PROJECT PAKISTAN" & "BRAMERZ" TO CHOOSE THE RIGHT PLATFORM FROM THE GROUNDS UP, AND USING INDUSTRY PRACTICES TO BUILD UPON IT.

Data Management

With the ever-changing data, MongoDB fits the picture perfectly. The platform was developed considering a mirror image of social media platforms so MongoDB played its part to organize the data as needed.

Development Environment

MERN Stack was used to build up the platform. A quick end-to-end means that users of your application will have access to their data much faster which is very advantageous indeed. The giants backed by MERN Stack: Facebook, Dropbox, Airbnb, Atlassian, Tesla, etc.

Third party Services

In order to make the notifications work seamlessly, we used firebase cloud messaging. Data will talk to you if you're willing to listen and for that sole reason we used Google Tag Manager. Integrated Chat, Audio/Video as well as SMS Verification with Twilio. AWS serverless for cloud services

What makes you unique

It serves a variety of purposes, making presentations powerful tools for convincing and teaching.

FRiZHUB

A Dock for a Sailing Justice

Dashboard

Lawyers to see the total cases, pending cases, decided cases, case Requests, and my cases", "diary", "helpline", "notifications" and a button which will expand a tab where the "lawyers" can see "profile", "settings", and "logout"

Cases Market Place

Allowing lawyers to see all the cases available on the platform associated with his/her expertise and choose them accordingly if wishes to proceed with any.

JPP Helpline

Allowing "clients" to contact technical resource persons if they find any difficulty utilizing it.

User / Clerk

Allowing lawyers to "add" or "remove" clerks if they have them and can assign them roles associated with the case.

Settings

The application/system will allow "clients" to "edit" their account information that was asked when he/she was signing up as well as "Phone Number" and "Password".

Create Case

Allowing "Clients" to "create a case" in which they are accused of or want to get justice associated with any problem they face. It will allow the "client" to fill up the details by just answering the questions shown.

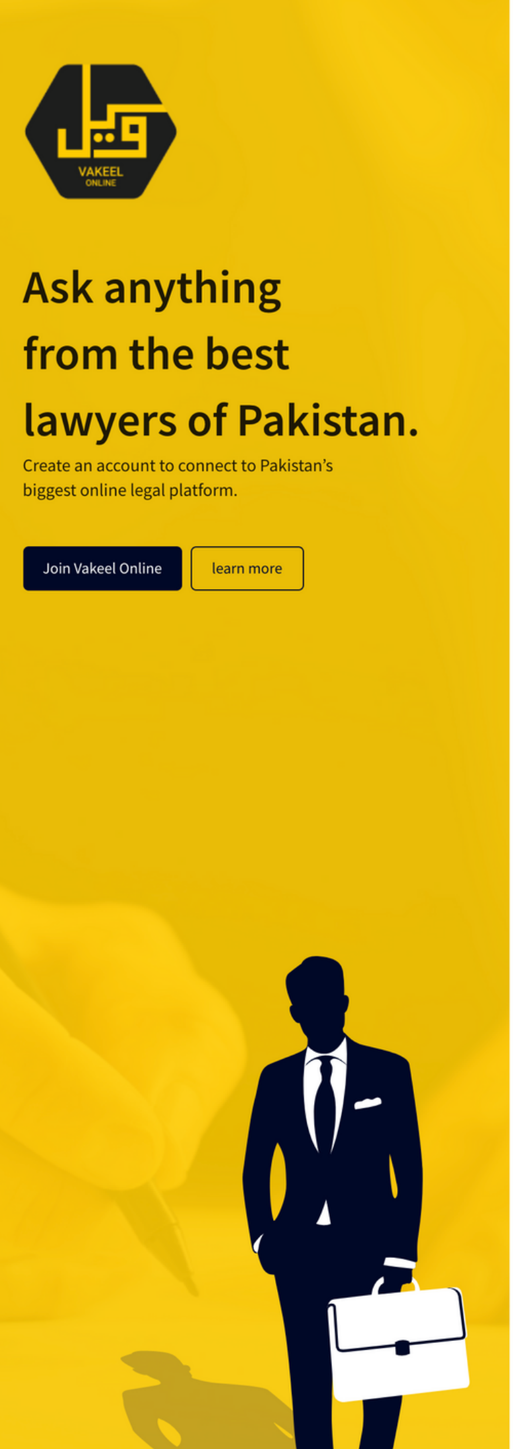
FRiZHUB

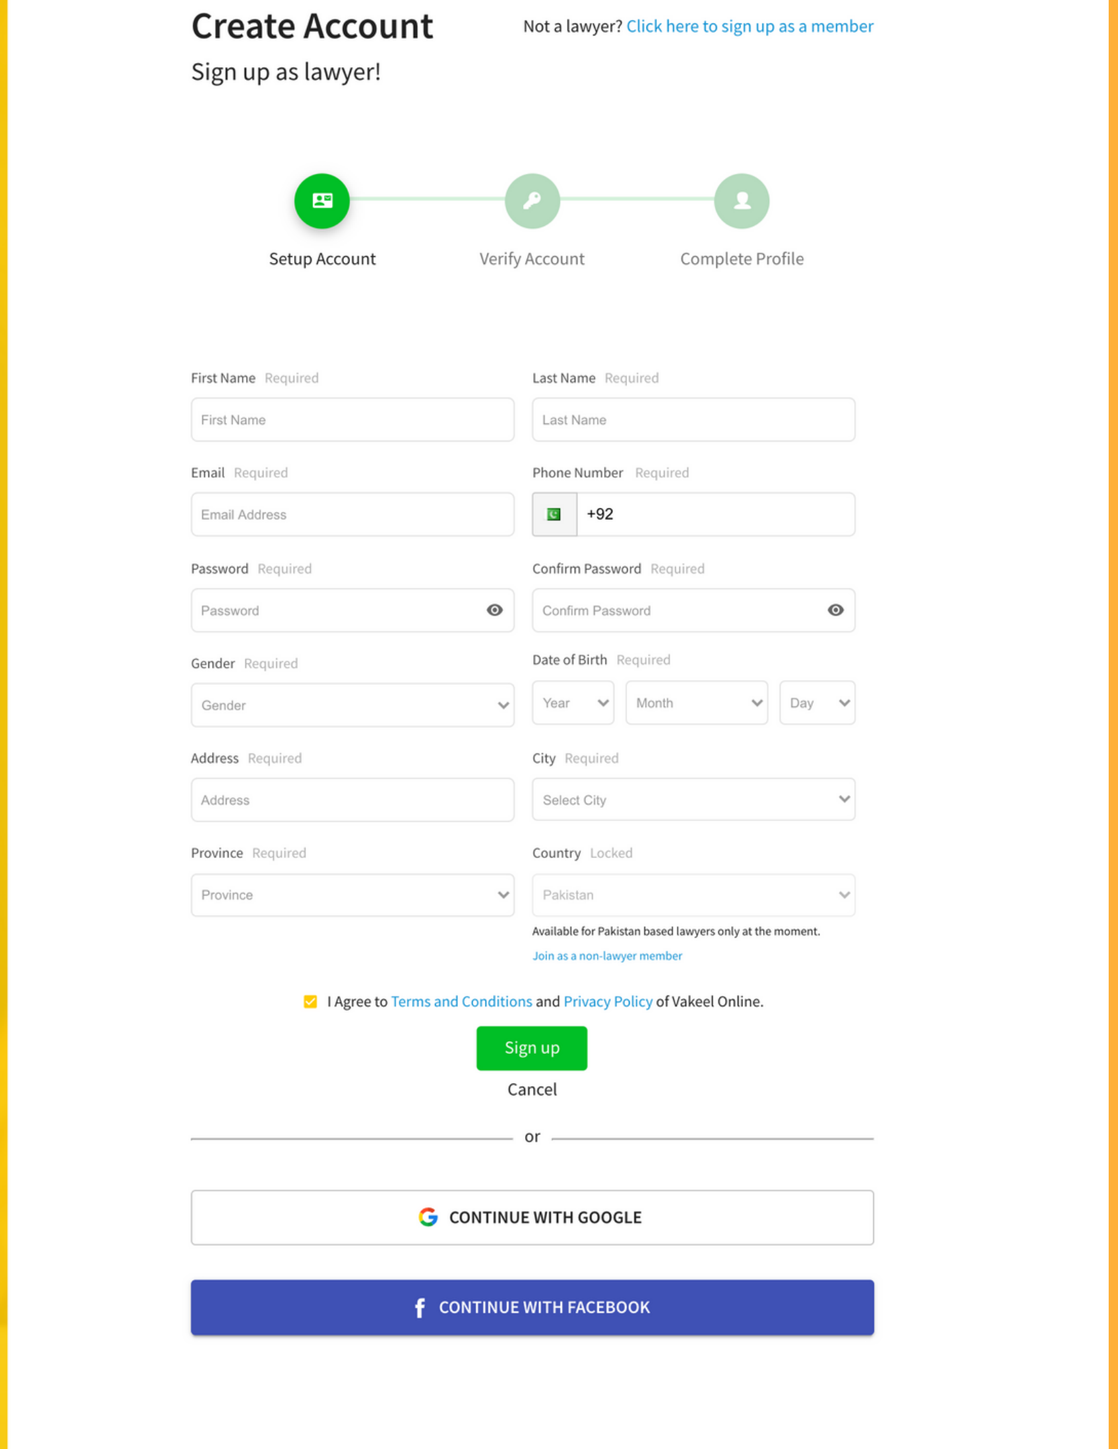
Design Layouts

The design of the app was a big challenge. Although this was just another platform, attention to detail was very important. To advance the conventional modes of client building means each minute detail is of equal importance. The **ReactJS** and **Material UI** dashboard was designed completely in-house. The next sections translate to the following screens:

1. **Register/Login**
2. **Social Media Marketplace**
3. **Find Lawyers**
4. **Create Post**
5. **Cases Details (Lawyers and Clients)**
6. **Profile**

Frizhub designed & developed a custom and Modern era solution for "Justice project Pakistan" to aggregate all results in a single SAAS Application





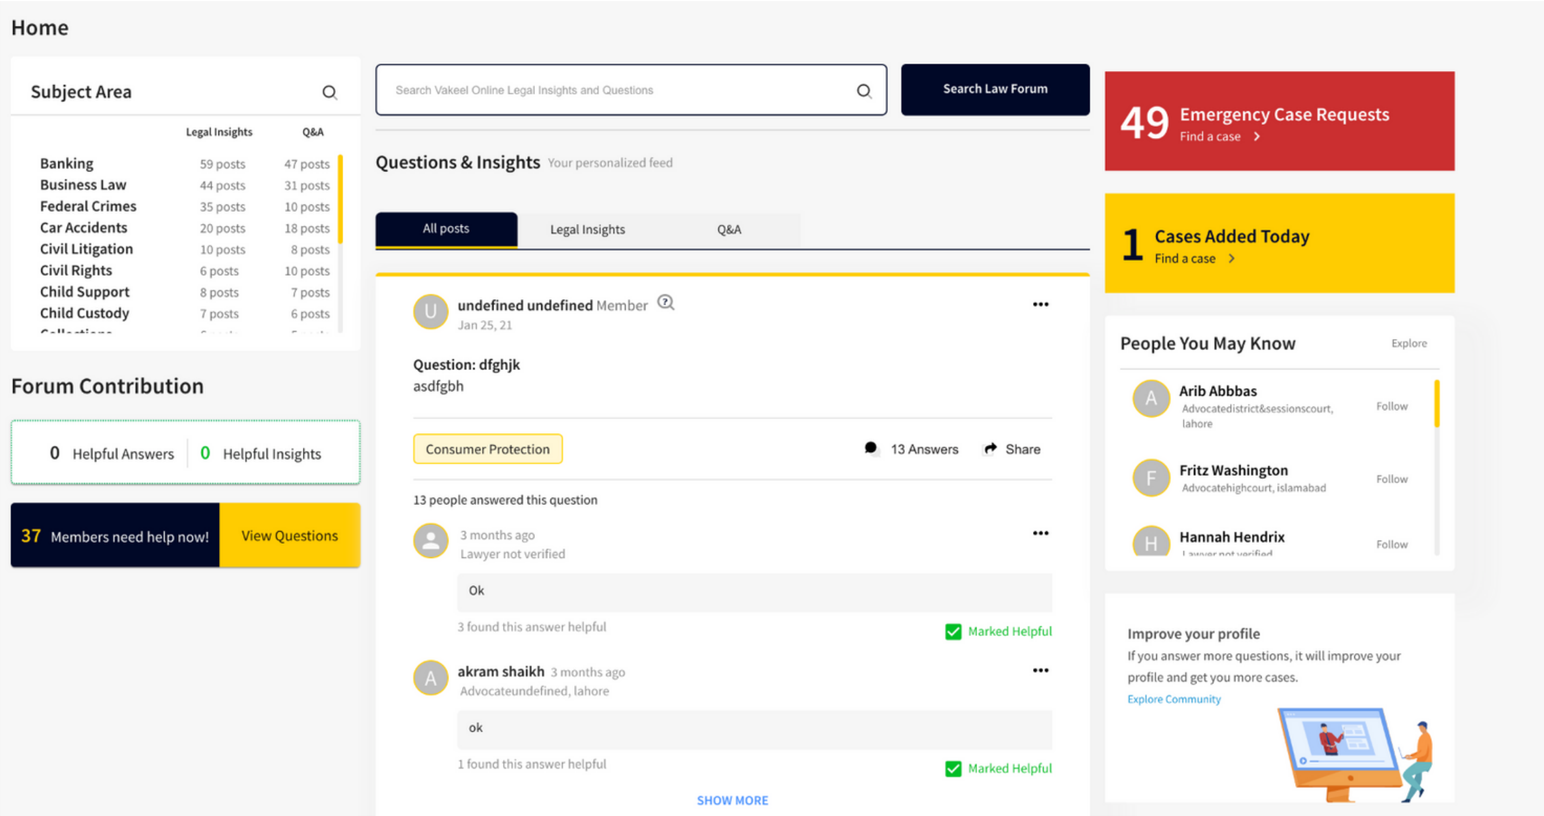
Landing Page

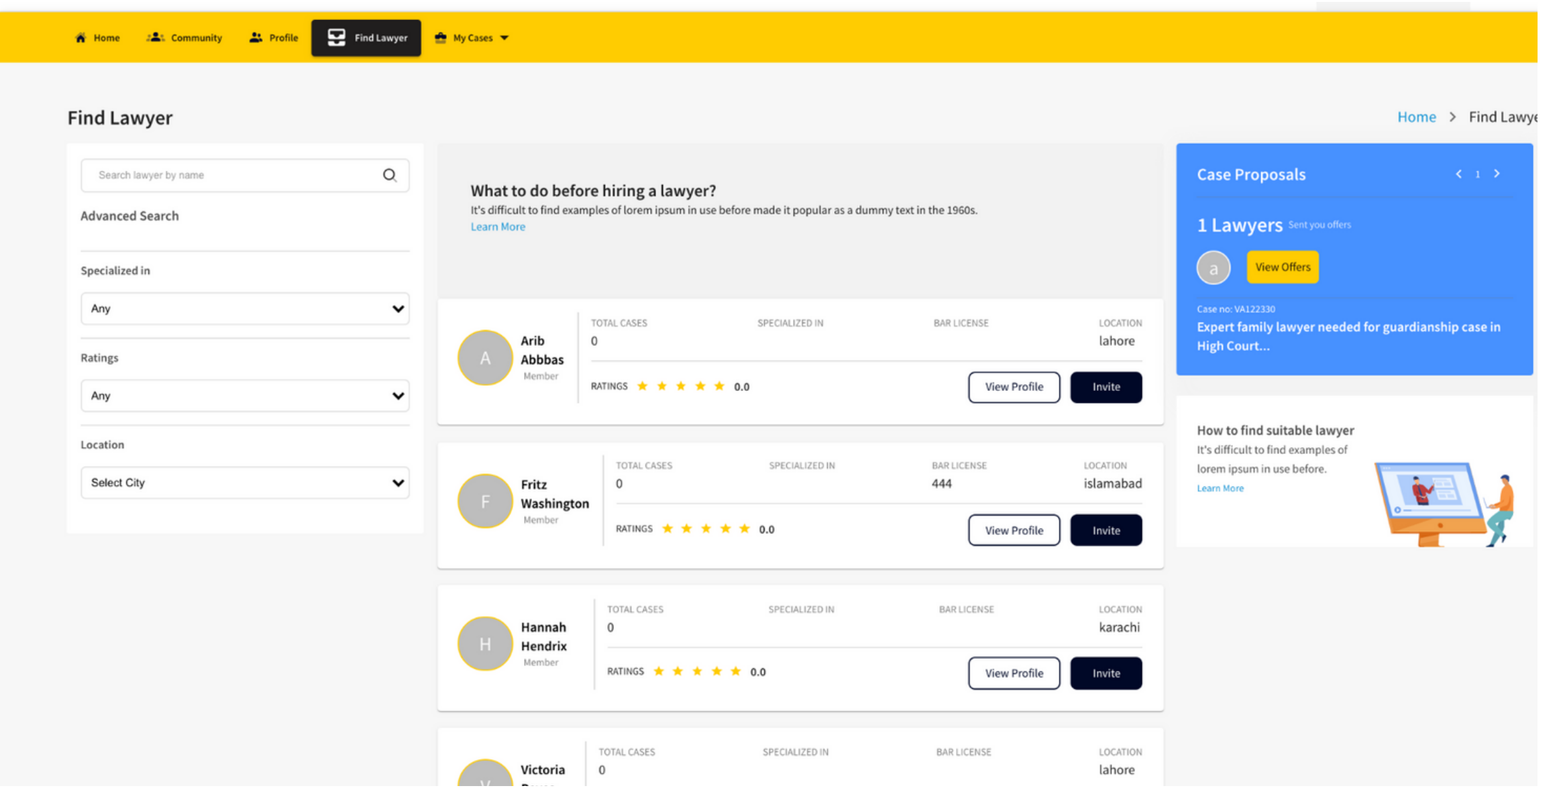
First thing first, a platform "Sign-up" is what a user goes for in the first place. The topic of interest should begin from there. This section allows the users to get him/herself registered and Log-in into the platform.

FRIZHUB

Market Place

This page shows a social marketplace where lawyers can post relevant information and Clients may share queries associated with their case.





Lawyer Search

This page allows Clients to Search and selects the best suitable lawyer for their associated case.

FRIZHUB
