Redesign Fashion

How Frizhub helped Voor to merge eCommerce with reality for Fashion Industry?

frizhub case study

voor

About Voor

A digitized 3D platform that enables shoppers to visit brand showrooms virtually on their desktops & smart gadgets in an unprecedented manner.

Technology and fashion have been intertwined ever since the eCommerce global boom post-Covid era, and the importance of customer experience is now setting new boundaries for designers and brands to reshape their business strategies.

Showcasing the effort designers and brands put in a little span of time and hustle is a must.

FRiZHUB

Reshaping Fashion Norms

The fashion industry has always been fast-paced, but in the digital era, it has the capacity to change faster than ever.

Things are reshaping pretty quickly and along with certain changes people tend to change their fashion norms, especially the way they approach brands.

In the continuous cycles of research and brainstorming sessions linked with the competitive study of the fashion industry, we highlighted and categorized that our main challenges were:

Problem

customers visiting outlets physically and establishing designs with zero-waste methods.

Affect and Impacts

- To remove billions of dollars lost every year due to conventional brick & mortar stores in the post-Covid era
- To establish digital showrooms, new B2B practices, and innovative sampling
- Breaking traditional barriers of the eCommerce industry.

Solution

A web devised virtual 3d platform to enhance customer viability.

FRiZHUB

Tech Stack Implementation

Data Management

The selection of **AWS lighsail** was mainly security and on-demand Scalability

Development Environment

UNREAL Engine, the world's most open and advanced real-time 3D creation tool for photoreal visuals and immersive experiences. **Furioos unreal engine** to embed visuals on websites and reduce ample load time for heavy 3d files

Third party Services

The 3D stores are then integrated with Shopify to accommodate the existing stores and avoid rebuilding or creating the wheel

What makes you unique

Frizhub designed & developed a custom and Modern era solution to tackle the traditional flow of the fashion industry via tech in the most crucial times of covid-19.

FRiZHUB

Digitizing Fashion Operations

Reducing materials and physical sampling is sustainable AND cost-effective.

Ditching the physical samples and shifting towards digitized or virtual ones will be a major change.

Despite the availability of technologies for online buying and digital showrooms, brands were caught unprepared at the end of February, when the Covid-19 outbreak arrived in Europe.

Deploying a solution that can sustain the old customer base and attracts new ones is a must in current or future health crisis.

FRiZHUB

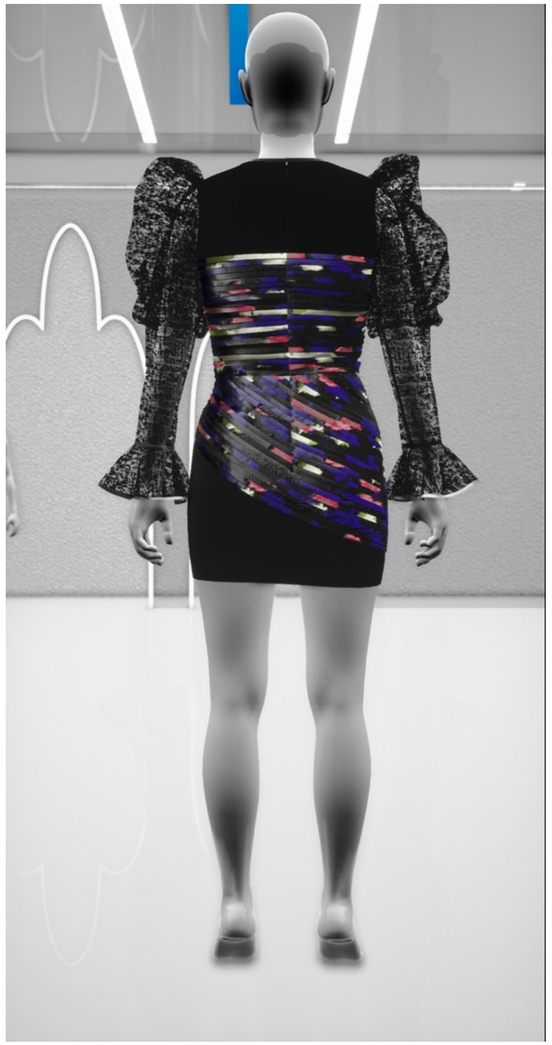
Design Mappings

The design of the web portals was a big challenge. Although this was just another digitized platform, attention to detail was very important. Color scheme to uplinks and interface is designed to facilitate designers and customers in an effective manner. The UNREAL Engine was utilized to develop showrooms whilst Furioos for streaming 3D.

FRiZHUB

3d Visualization

People adopt different personalities for different digital platforms, each requiring different dress codes. A trendy design with an eye-catching reality.



FRIZHUB

Showroom

Virtual showrooms and a digitized environment have changed the relationship between buyers and manufacturers, connecting them to a world without international travel. Bridging the gap between physical stores and customers.

FRIZHUB

Hudson Wellesley

This virtual showroom was created for Hudson Wellesley. Hudson Wellesley is a menswear brand made for the sophisticated and refined modern man who enjoys the finer things in life and worldly experiences.

FRIZHUB

MARIA MAURIO

Interest in virtual fashion has exploded during the coronavirus pandemic as people explore ways of dressing their online avatars

MARIA MAURIO

A Tie-Dye to die for. A splash of 3d color, rendering down the narrative in every pitch and dimension of the design.

VOOR

The Oceanic day event turned into a 3D Ocean Day Event! The underwater showroom showcases the brilliant designs of Runaray and American Umma. This groovy event turned out to be a game-changer in the digital fashion industry
